PROJECTS

Leads Tracker Chrome Extension

I made this chrome extension using which we can save important tabs/URLs and can open them whenever needed. Its similar to the bookmark feature in chrome
Application used: JavaScript/React.

Blackjack Game

I made this Blackjack game just to spend few hours playing it.
Application used: JavaScript/React

Color Picker

I made this webpage whose background color will change randomly as you click on the "Click Me" button, and you can pick any random color you like for your project
Application used: JavaScript/React
